Things to keep in mind for the spring storm season

Cordless phones have become very popular due to their convenience and portability. On the down side, they will not work during a power outage. Consequently, if you have only cordless phones in your home, you will be without telephone service if there is a power outage.

A standard corded telephone does not require AC power to function and will continue to operate even when the electric service is disrupted. Make sure that friends and family keep a corded phone also so you will be able to keep in touch.

Be safe and watch for slow moving farm machinery

Each child's name drawn at Annual Meeting won a \$10 gift card

In Memory

Darren Hoyt
1965-2008

WTCI, ITA and WIN will greatly miss our friend and co-worker. Darren started his career in 1987 with ITA as an installer/repair person. He transferred in 1990 to WTCI and held the positions of Warehouseman, I&R, Cable Splicer and Central Office Tech. In February 2007 Darren was promoted to supervise the Video and CATV operations with WIN.
